How did they know our name?

REGISTER DISPOSITION

The transfer inventory reports seven pages missing. No evidence establishes that the pages were present immediately before transfer. It is therefore not possible to classify their absence as loss, removal or non-delivery.

> A missing record is only overdue where a delivery date can be established.
>
> Records Control / closure basis

The register is closed as complete with exclusions. Any later page numbered G-1 through G-7 shall be treated as a new acquisition and need not reopen the 1992 transfer.
